Course Outline

Kemp Advanced Technical Training

KEMP Advanced Technical Training

The KEMP Advanced Technical Training is part of the KEMP Technologies' LoadMaster Training Program and available to all VARMaster Partners in the Benelux.

The LoadMaster Training Program is designed to help partners learn about all the features, benefits and technical details of KEMP's LoadMaster product family, and the network environment within which the LoadMaster is deployed. Once complete, partners are equipped with the knowledge to size, install, support and troubleshoot the LoadMaster products including all advanced features.

The Advanced Technical Training is essential to learn more on the advanced technical features of the LoadMaster Product line and to gain more in depth knowledge on KEMP. KEMP partners are enabled to support the KEMP products even better.

TYPE

Classroom based Advanced Training

OBJECTIVES

Upon completion of the course, you will be able to:

- Help solve routing issues
- Enable and use content switching
- Use advanced security features including
 - IPS
 - Lab
 - ESP
 - WAF
- Enable the use of ESP with AD
- Enable and use GEO load balancing

AUDIENCE

KEMP Advanced Technical Training is targeted specifically at KEMP resellers / partners who are involved in the design, deployment, or administration/technical support of LoadMaster appliances and software.
